

1. Complete <https://try.github.io>
2. Create a repository named: "[YourGitHubName.github.com](https://try.github.io)" on your Github account

donigian.github.com

armen donigian development blog

Updated on Jul 7, 2013

3. Commit a file to that repository with extension .md which who's content includes:

Top N things you learned about a non-graphical editor

1. set command...
 2. modes in vi
- etc...

Top N things you learned about a graphical editor.

1. Editors are as good as number of plugins they have
 2. Looks are deceiving...
- etc...

Optional:

<https://stackedit.io/editor> to see examples of how to format your document. Otherwise just type it as regular text.
